The Code Alert® Wireless Call Solution improves safety, reduces risk, and increases staff efficiency. The system quickly alerts caregivers when a resident has called for assistance wherever they happen to be inside of the facility. The Code Alert System is fully supervised and notifies staff if a system component is out of the covered area or if a call device's battery level is low. For maximum reliability and peace of mind, the Code Alert Wireless Call Solution fully conforms to the UL 1069 Standard for Hospital Signaling and Nurse Call Equipment.

Emergency and Nurse Call Options

The Code Alert Wireless Call Solution offers a large variety of call devices. From fixed nurse call cords and pull cord stations to mobile pendants to smoke alarms and motion detectors, Code Alert has the devices you need to provide maximum safety and security to your facility.

Alarm Notification Options

The Code Alert Wireless Call software can send immediate system alerts to a variety of fully integrated remote event notification devices including QuickLook™ LED displays, handheld pagers, and many phone systems in use by facilities today, such as Spectralink, Avaya, and Cisco. The Code Alert software can also send e-mails to any networked PC, or text messages to any cell phone.

The Code Alert® Benefit

- **Fully Scalable Solution** – from a handful of residents to campus-wide with multiple buildings including hundreds of residents
- **Easy to Retrofit** – minimal wiring required results in simple, low cost installations
- **Reliable Communication of Alerts** – self-healing wireless network continues to function fully even if network components become damaged
- **Fully Reconfigurable** – can easily relocate devices at any time to best suit the needs of your changing facility
- **Resident Location** – call pendant alerts give resident name and location wherever they are in the facility
- **Easy-to-Use Touch Screen Software** – with a variety of reporting capabilities for analyzing and improving care trends, creating customized care plans, and more

Reporting Capability

The Code Alert software provides many reporting capabilities including response time reports, event cause reports, and resident care time reports. Resident-specific information, such as medical history and emergency contacts can be accessed from the system and printed in an emergency situation. Information is sufficiently secure to comply with your HIPAA program.

Code Alert® Integrated Care Management

Code Alert Systems can be easily upgraded to a comprehensive monitoring platform that offers wireless fully supervised systems. RF Technologies offers a wireless network that provides wandering, nurse call, fall, and device monitoring solutions for senior living communities.

24/7 Technical Support and Services

The RF Technologies team works with your facility throughout the life cycle of your systems, reducing risk and liability while maintaining the integrity of your systems at a lower cost. We are proud to offer a world-class service desk 24/7, with trained technicians ready to troubleshoot and answer your questions.

- Service Level Agreements
- No Charge Technical Phone Support
- Factory Trained and Certified Installer Network
- Online Technical and User Training Modules

About RF Technologies

RF Technologies is a leading provider of comprehensive, integrated RFID Safety and Security systems, WiFi RTLS systems, and healthcare enterprise solutions. With an installed base of more than 10,000 systems worldwide, RF Technologies specializes in state-of-the-art healthcare solutions for senior care facilities and hospitals, including Safe Place® Infant Security and Emergency Department Solutions, Code Alert® Wandering Management and Wireless Nurse Call, Sensatec® Fall Management Solutions, Help Alert® Emergency Call and PinPoint® RTLS Solutions. The company is credited with inventing the first RFID infant security system, which was designed and developed by nurse clinicians. It was the first in the industry to invent Peer-to-Peer WiFi RTLS, and to offer Remote Monitoring, RF Consulting and 24/7 technical support by RF Technologies' staff specialists and a nationwide service management team.
